

ANNOUNCING

ScanForce & VBScan Bring You A Bar Code Solution Compatible With JobOps

Are manufacturing or warehouse **data entry errors costing your money**? **Reduce your data error rates** with a JobOps® compatible bar code solution from ScanForce and VBScan.

ScanForce Warehouse Automation brings you:

- Automated Shipping, Receiving, and Inventory transactions such as Physical Count
- Instant data validation on the handheld
- The only Sage Certified Bar Code solution for Sage MAS 90 and MAS 200

VBScan brings you:

- Track labor against JobOps work tickets
- Issue materials against JobOps work tickets
- Log status changes, quantity complete and comments to work tickets

Together, the integrated solution delivers:

- Mobile, WiFi functionality – no need for a computer on the shop floor
- Eliminate redundant and error-prone data entry
- Immediate access to accurate up-to-date data
