Manufacturers are constantly looking for ways to increase facility throughput, reduce costs and improve on-time shipments. How can you streamline your operations if you aren't sure what's happening on the shop floor in real-time?

Powered by Scanco, Shop Floor integrates with Sage Production Management to capture work progress and material usage in real-time, increasing data entry accuracy while dramatically reducing the effort involved in managing production and job data.

Created specifically for production and warehouse personnel, Shop Floor for Sage Production Management provides a user-friendly visual front end accessible via Windows desktop or mobile device (iOS or Android). With Shop Floor, personnel can easily and conveniently perform labor transactions, material issue and material completion transactions, and update job statuses.

Benefits

- Mobile capture production activities at the "manufacturing moment"

- Eliminate manual processes, inventory tracking, and paper documentation

- Ensure total production visibility to the shop floor

- Detect issues in real time for rapid or preemptive resolution

Sage Production Management and Shop Floor combine to deliver a powerful manufacturing automation solution that simplifies data capture by extending access to role-appropriate transactional tasks to individuals who do not require full access to Sage Production Management.

Features

Labor Transactions	• Clock In/Out on Work Ticket and/or Step • Review transactions before sending to Sage Production Management
Material Issue Transactions	• Issue materials on Work Ticket • Review transaction before sending to Sage Production Management • Display quantity remaining
Material Completion Transactions	• Review transactions before sending to Sage Production Management • Filter Work Tickets by Work Ticket Class
Status Update Transactions	• Change status on Work Ticket steps • Accuracy of scrapped materials tracking • Review transaction before sending to Sage Production Management
Supported Operating Systems	• iOS, Android, Windows
