## SAGE 100 2025 COMING SOON

### HERE'S A LOOK AT WHAT TO EXPECT

Sage has provided a bit more detail on the upcoming new release of Sage 100 2025. Let's take a look at some key new features that are expected in April 2025.

### Sage 100 2025 Expected New Features

Sage published a very high-level glimpse of what's to come with the release of Sage 100 2025. Here's a peek at a few key new features or enhancements:

#### Core Financial Management

- A/R Invoice Number Expansion to 20 characters
- A/R Add Last Invoice Date and Last Invoice Amount in AR Customer Maintenance
- A/P Invoice Payment Selection (Ctrl+Shift)
- G/L General ledger reversing entry date

#### Order Entry and Purchasing

- Request for Quote in purchasing
- Require Cancel and Reason Code when Deleting an Order/Quote
- Ability to Add Customer Phone Number in order entry
- Return of Goods - Do Not Backorder Purchase Order when Item Returned
- Sales and Purchase order Audit Tracking

#### Production Management

- Enhanced Scheduling to Calculate Budgets
- Labor Entry Piece Rate
- Template Maintenance - Alphanumeric Revision Numbers and Descriptions, Attachments, Copy/Renumber Step and Display All Steps in List View
- Ability to reverse Work Ticket Costs and Quantities through P/O Return of Goods

#### Inventory Management

- Print Extended Item Description on S/O Forms and I/M Physical Count Worksheet
- Sort Physical Count by Product Line in Inventory Management
- View Production/Purchase Quantity Detail in inventory production management

### Get Ready for Sage 100 2025

These key highlights do not include the full list of planned new features published by Sage. Anticipated new features and target release dates are subject to change any time.

For full details, refer to this [Sage Knowledgebase Article](#) or contact us with your questions.

# SAGE 100 BITS AND BYTES

## Introducing Sage Future: A New Conference Experience

Registration is now open for **Sage Future** ... a new and re-imagined partner and customer conference that expects to welcome 5,000+ attendees from across the US and Canada.

### What is Sage Future?

Sage Future is an annual user conference that brings both customers and Sage partners together to collaborate, learn, network, and have a little fun. In a nutshell, it's the evolution of what was formerly referred to most recently as Sage Transform and before that, Sage Summit.

However according to Sage executives, they're transforming Sage Future to be **more than just a software conference**. The event aims to inspire innovation and growth in the finance and accounting industry through immersive industry sessions, professional development opportunities, and in-depth product explorations.

According to a Sage executive in the ERP division, "At Sage Future, we'll dive into topics that really matter in today's business landscape—such as AI and the evolving strategic needs of the finance function - helping attendees navigate complexity and become catalysts for high performance within their businesses."

### Conference Details

**When:** June 3-5, 2025

**Where:** Georgia World Congress Center in Atlanta, GA

**Registration:** Click [Sage Future Registration](#) for pricing and other details.

**Save \$300 with early bird pricing until April 1, 2025**

### Alert! How To Avoid Sage Support Scams

Since Sage is a known brand with customers using their software worldwide, it's also a target for scammers and opportunists. So we wanted to take a moment to provide some tips and resources to help avoid some of these scams.

#### Don't Use Search Engines to Find Support Contacts

Using Google to search for Sage Support contacts can lead you to fake phone numbers or websites that look like Sage, but are not (particularly paid or sponsored search results).

#### Initiate Support With In-Product Chat

A great way to initiate support is to use the in-product chat feature which is accessible from the Sage 100 help menu.

Or better yet, [contact us](#) directly and we'll either assist or point you in the right direction.

# WHAT'S NEW AT VBCC

## The VBCC Team is Growing!

Vrakas/Blum Computer Consulting, LLC (VBCC) is pleased to welcome **Patrick Anson** and **Mackenzie Cook** as new employees.

### Patrick Anson

**Patrick Anson** joins VBCC as a Senior Solutions Consultant. Pat is a proactive and strategic financial leader with over 35 years of expertise in financial systems, ERP implementation, and cross-industry financial management. He is accomplished in transforming financial operations for enhanced efficiency, cost reduction, and organizational success.

Pat is recognized for spearheading complex ERP implementations, optimizing processes, and delivering impactful insights through advanced financial reporting, dashboards, and KPIs. He is adept at aligning technology with business goals by inspiring and leading high-performing teams and fostering collaboration across C-level executives and cross-functional stakeholders while delivering measurable value.

He is a visionary leader with a proven history of enhancing profitability and fostering sustainable growth across industries such as manufacturing, distribution, and professional services.

Pat is a consummate professional with exceptional business acumen whose expertise has positively impacted hundreds of clients and numerous employers throughout his career. Along with this, Pat is certified in the following:

- Sage Intacct Certified Implementation Consultant
- Sage Intacct Financial Report Writing
- Sage Intacct Construction Certified Sales Professional
- Sage SDMO

- Sage 100 Certified Trainer
- Sage 100 Certified Technical Consultant
- Sage Operations Management
- Sage CRM

### Mackenzie Cook

**Mackenzie Cook** joins VBCC as a Sage Intacct Implementations Consultant. Kenzie is skilled in Sage Intacct implementation and has a knack for simplifying ERP systems and making business processes work better. She assists clients with everything from onboarding and data migration to customizing solutions that fit these needs.

With a certification in Sage Intacct and a focus on delivering tangible results, Kenzie takes pride in creating smooth transitions and insightful financial tools that make a difference. She's passionate about building strong client relationships and finding the best solutions to help businesses thrive.

Through her dedication and client-focused approach, she strives to provide exceptional service and ensure that clients' software systems are adaptive and aligned with their business growth and changing needs. Kenzie is a certified Sage Intacct Implementations Consultant.

VBCC is thrilled to welcome these talented professionals to the team to further enhance client service, industry knowledge, and product lines offered.
