INFRASTRUCTURE HOSTING SERVICES

SWKTECH.COM

WHO IS INFRASTRUCTURE AS A SERVICE (IAAS) FOR?

- Businesses with addons or multiple applications
- Businesses with multiple locations
- If your user count has outgrown application hosting
- If it is time to update on premises hardware
- Dated hardware
- Expiring or final year of your server renewal
- Need to upgrade IT infrastructure
- If you're experiencing rapid growth where scaling hardware may be an issue

WHY SWK?

- With decades of experience we know your ERP and environment (Hint: You can't go to AWS and ask them to set up an environment for your ERP)
- Affordable option compared to AWS or Azure, with no hidden fees
- Protected by world-leading cybersecurity with 24x7x365 security monitoring
- Full business continuity & redundancy
- Strong productivity with load balancing, parallel processing and job scheduling
- Dynamic provisioning of resources means flexibility and speed for the customer

WHY INFRASTRUCTURE HOSTING SERVICES?

- Get more out of your IT infrastructure and focus on your business instead of worrying about ever-changing technology.

BENEFITS OF IAAS

- Get a steady budget – No more costly hardware upgrades
- Access your data anywhere you have an internet connection
- Free up office space and reduce power consumption – take back that server room and costs for maintaining it
- Maintenance Free
- Cybersecurity – Protected and monitored by a Security Operations Center (SOC).
- Always have up to date hardware and software for your infrastructure without the investment
- Free up your IT team to focus on business objectives
- Scalable hardware

Talk to us about how to leverage our deep ERP and industry knowledge for your business.
