Manufacturing 100

Automation For Manufacturing

Sage 100 | Sage 100cloud Manufacturing

Scanco Manufacturing 100 Mobile App is the new barcode data collection system for Sage 100cloud Manufacturing/JobOps. It performs all the standard tracking functions like Material Issues, Labor Tracking, Status Updates, Finished Goods Entries, and Time Card.

Take Your Manufacturing To The Next Level.

“ No other function within your organization is as labor intensive as tracking the parts and labor associated with your jobs.

Every point in the process where you rely on employees to write down or enter information manually is an opportunity for error. Re-entering data from time cards or job tickets is costly and wasteful. MFG 100 eliminates manual data entry tasks delivering immediate access to accurate, up-to-date information. Easy and intuitive to use, so your payback begins immediately, not after a lengthy training and implementation period. **MFG100 delivers just what you need, when and where you need it.**

FAST & ACCURATE

LIVE MONITORING

COST EFFECTIVE

The **ONLY** Mobile Solution

Optimized for Sage 100cloud Manufacturing/JobOps.

Manufacturing 100 is a highly flexible, mobile and adaptable barcode data collection solution that is ideal for manufacturers using Sage 100cloud Manufacturing/JobOps Software.

Developed to work seamlessly with your Sage Manufacturing/JobOps Software and internal processes.

Manufacturing 100 is the only mobile application on the market that is developed by the team behind Sage Manufacturing/JobOps. What does that mean for you? It means that you can be confident that when it comes time to installing, deploying and on-boarding your employees that its backed with the knowledgeable team that helped develop one of the most powerful manufacturing solutions on the market, JobOps.
