Intelligent automation & logic-based spend

Fraxion is trusted by over 1,000 companies with over 200,000 users worldwide.

Fraxion streamlines procure-to-pay processes by providing real-time integration with Sage 100 and providing flexible automation efficiency improvements with spend controls built into every enhancement.

Use Fraxion to boost efficiency by eliminating duplicate entry entirely. Fraxion integrates seamlessly with your Sage 100, integrating with fields like vendors, GL accounts, projects, inventory items, budgets, and currencies. End users can create requisitions or expense requests, route them for approval, and transmit the POs and AP transactions directly into your Sage 100 accounting system.

Get industry-leading intelligent automation that is flexible and highly configurable. Fraxion's automation delivers valuable time savings by streamlining processes and removing approval delays in your workflow.

- ✓ Improve spend visibility & reporting
- ✓ Complete audit trail
- ✓ Streamline your approval process with intelligent automation
- ✓ Rapid return on your spend

Save time, money & simplify

Increase efficiency, visibility, controls & get rapid ROI

Improve compliance with comprehensive spending controls

Boost productivity, cost savings and spend less time working with manual or inefficient systems.

Fraxion offers a simple-to-use interface that reduces time-to-train and improves adoption, while aiding in compliance with Sarbanes-Oxley. The tailored approach further saves time and money to deliver a rapid return on investment. Fraxion's solid platform of core features can be further extended by selecting from our comprehensive catalog of feature add-ons. Ensure your organization has the spend management system it needs.

Top core features

The core of Fraxion is built around its industry leading approval workflow engine that automates every step of the approval process. It's further enhanced with features like a localized experience (English, French and Spanish), enhanced real-time notifications, built-in system intelligence, reporting & oversight, customizable user view and much more.
