1. SCALE AS YOU GROW

Effortlessly add users, carriers, locations, and shipping modes as your business expands, with no extra costs or limitations.

2. SAVE ON FREIGHT COSTS

Leverage a multi-modal rating engine, automated rate shopping, and TL spot quote auctions to reduce freight spend across all shipping modes..

3. SIMPLIFY OPERATIONS

Automate small parcel manifesting, freight tendering, shipping documents, and international shipments to streamline day-to-day processes.

4. REAL-TIME VISIBILITY

Track every parcel and freight shipment in one platform, get automated alerts, and access reporting to keep customers informed.

5. SEAMLESS INTEGRATIONS

Connect ShipLinx TMS with ERP, WMS, OMS, and other systems in real time to future-proof your technology ecosystem.

6. STREAMLINE RATE MANAGEMENT

Manage inbound, outbound, and third-party shipping easily, update carriers and rates quickly, and simplify complex shipping networks.

7. EXPERT SUPPORT INCLUDED

Receive Scottsdale-based technical support, training, and all personalizations with \$0 professional service fees included.

8. ACTIONABLE INSIGHTS

Custom dashboards, KPIs, and trend reports help you make proactive, data-driven decisions to optimize your transportation network.
